

Integrated Coastal and Ocean Management in Atlantic Canada

Development of a Web Portal to Support ICOM Initiatives and State of the Environment Reporting in Atlantic Canada

A Presentation for Discussion to the ACZISC ICOM Working Group – 14 May 2009 by Tim Hall, DFO Maritimes

The Backdrop

- ACZISC ICOM Working Group Paper
- Governance Mechanisms in Atlantic Canada (EC and DFO)
- State of the Environment Reporting
- COINAtlantic
- Oceans Act Responsibilities (DFO)

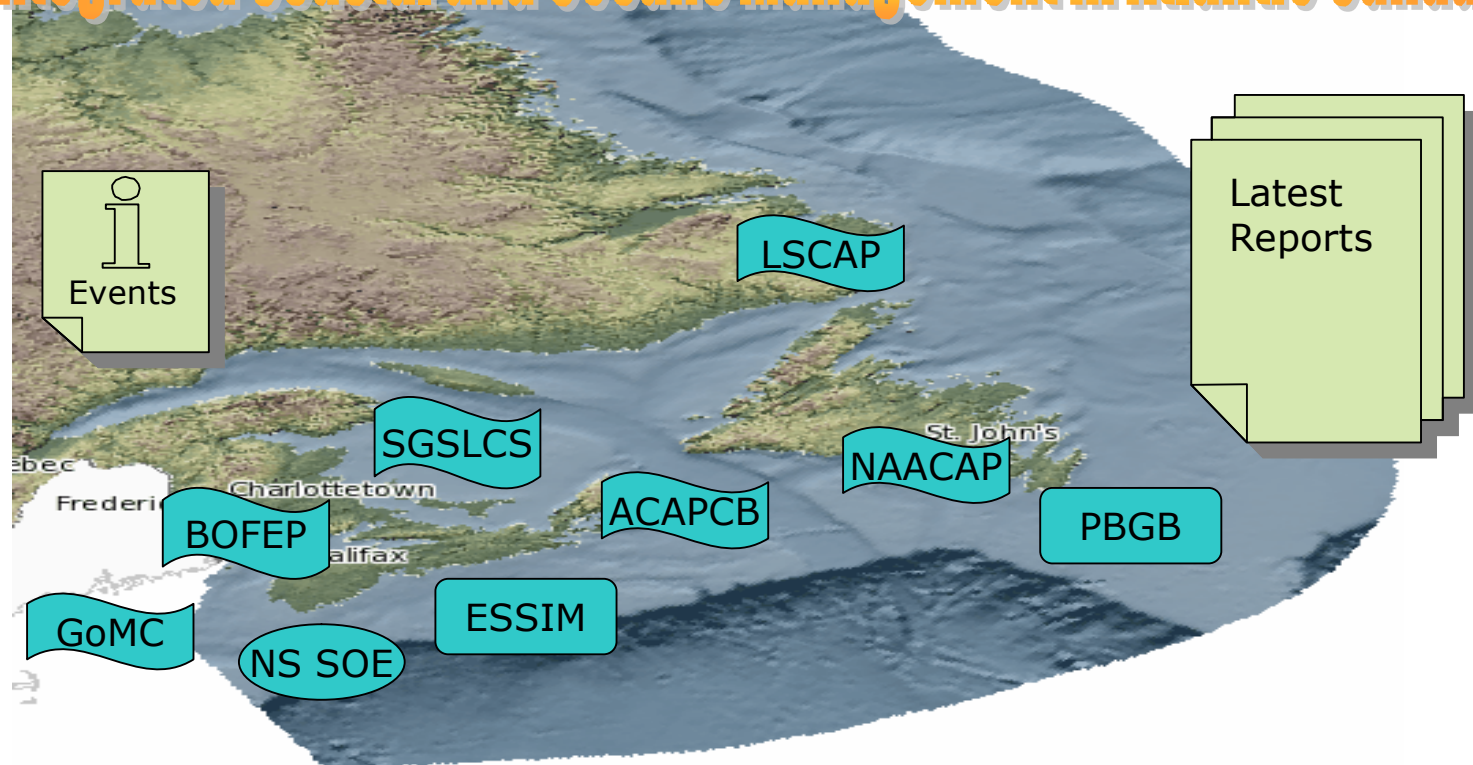

The Concept

- A centralized location on the web where anyone can get the big picture of ICOM activities and SOE reporting in Atlantic Canada
- A “home” for all ICOM initiatives based on common objectives and principles
- Canada’s *Oceans Act* requires the Government of Canada to support the development of Integrated Management plans for all waters
 - While responsibility is for DFO to lead and facilitate, it seems this task ideally suited to ACZISC (ICOM Working Group)

The Idea

Integrated Coastal and Oceans Management in Atlantic Canada

Developed and maintained by the ACZISC
Data provided via COINAtlantic
