

COINAtlantic

Are you challenged managing your organization's data and information?

Does your organization find it difficult to access the data and information you need from other sources?

Check out the COINAtlantic Advantage!!

The Coastal and Ocean Information Network Atlantic (COINAtlantic) has developed tools over the past 15 years to take advantage of established standards. COINAtlantic can help you share your location-based data and information in a Google searchable form. COINAtlantic can help you search for information on the internet across organizations. COINAtlantic can help you bring together the information you need onto your screen with minimal training and specialization.

Staff members with the COINAtlantic Secretariat

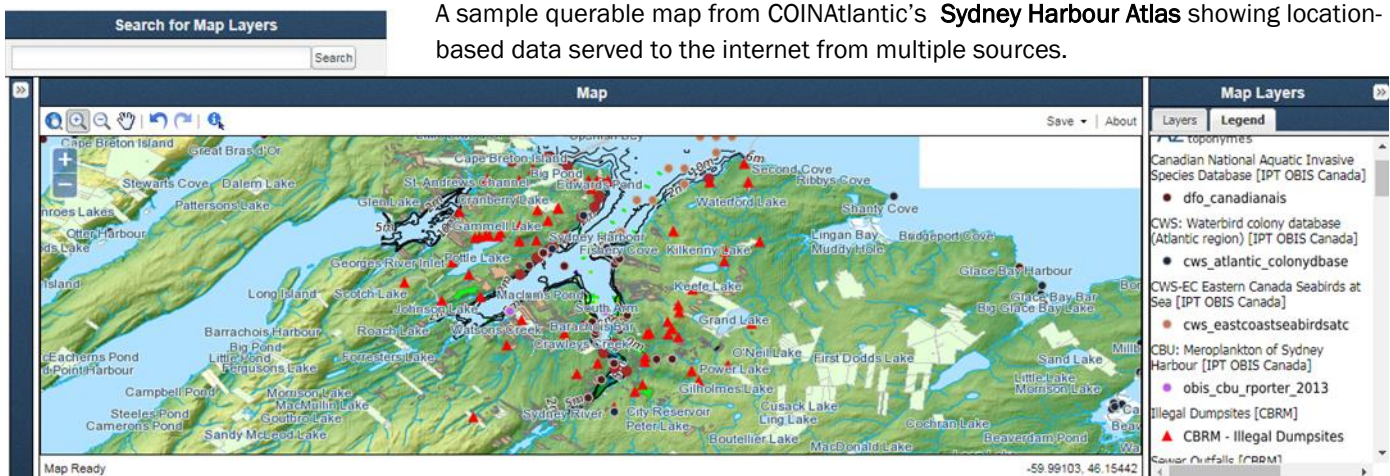

Bringing data together with the COINAtlantic Advantage

Working with a world expert in open source geospatial tools, COINAtlantic builds on an Atlantic Canadian partnership to improve access to coastal and oceans information for use in management and planning.
